

Clark Forklift

Presently, there are no less than 350,000 Clark forklifts performing globally, and upwards of 250,000 in use in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 particular parts intended for 20 unique models of lift trucks and automated equipment. Your regional Clark Seller is your total source for availability of all your components needs offered by Clark Totalift.

Clark's exceptional Parts Distribution Stores are conveniently situated in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Worldwide, Clark has one of the most amazing supplier support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the materials handling industry.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a customary feature on every lift truck.

Clark has a unyielding objective to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production facilities. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any environmental restrictions, thus placing them in a dominant market position.

Resource Efficient Manufacturing

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this method is particularly economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is intended to find and acknowledge the most efficient ways for manufacturing plant stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to perfect the effectiveness and brilliance of their products while minimizing expenses. The contemporary value engineering program combines progressive product improvement and offers superior customer support and service within the industry.
